

# RETIREMENT PLAN CONFIDENTIAL QUESTIONNAIRE

2014 Edition

## INTRODUCTION

Your completion of this questionnaire will enable the preparation of a Financial Plan dealing with tax, investment, and retirement issues. In preparation for the personal interview, fill in the Net Worth and Cash Flow statements. Bring along with you copies of your last two years tax returns, pension statements (including CPP), investment and RRSP statements. The balance can be filled in at our meeting.

#### **EXPLANATIONS FOR QUESTIONNAIRE**

#### Years before Retirement

If you have already retired, this is, of course, zero

## Number of years over which savings will be used

The minimum number of years over which your savings (principal and income) will be used to provide funds for retirement should be at least a couple of years greater than your life expectancy at retirement age.

	Life Expecta	ncy in Years
Retirement Age	Male	Female
60	21	26
65	17	22
70	12	17

#### **Eligibility for Employer Pensions**

If you belong to a pension plan and know what your pension will be at retirement, complete the entries in Table 1.

If you do not know what your pension will be, wait for Table 3 and describe the basis for determining the pension benefits.

#### **Eligibility for Government Pensions in Current Dollars.**

You can start collecting your Canada or Quebec Pension Plan at any age between 60 and 70. However, the amount of annual pension varies depending upon the age. The maximum age 65 retirement benefit in 2014 is \$12,460.

Age	<b>Maximum Annual Pension</b>	Age	<b>Maximum Annual Pension</b>
60	7,974	66	13,507
61	8,872	67	14,553
62	9,769	68	15,600
63	10,666	69	16,647
64	11,563	70	17,693
65	12 460		

If you have not been employed for most of your adult life, you may not be eligible for the maximum pension. If so, make a note of this matter on the last page of the questionnaire. You should bring a copy of your CPP statement. You can call CPP at 1 (800) 277-9914 to get an up to date statement

The Old Age Security is payable to residents of Canada 65 years of age or over. The maximum annual benefit is about \$6,618.

## **Current Savings**

Your tax sheltered savings include amounts in Tax Free Savings Accounts, Registered Retirement Savings Plans, Deferred Profit Sharing Plans and Registered Retirement Income Funds. Your tax paid capital includes any savings which you expect to have available for retirement, less any loans related to these savings.

The Pre-tax Investment Return is an estimate of the amount the capital will earn over the period of years chosen. Guaranteed, interest-paying investments are currently paying about 1% above inflation. Other investments, such as stocks & real estate, can earn higher returns, but at greater risk. A Pre-tax Investment Return of 4% (when inflation is 3%) is conservative (achieved without significant risk) and will provide a "safe" estimate of the retirement funds available.

Reduce the after-tax investment return by a percentage to take into account the taxes which will be paid on the pre-tax investment return. If all investment income is fully taxable at top marginal rates, a 39% tax rate is reasonable. If the income will be exempt from tax or in the form of dividends or capital gains, much lower rates will apply.

## Lifestyle Expenditures

Over the past 50 years, the inflation rate has been about 3% in Canada. Accordingly, inflation expected of 3% is reasonable.

After retirement, you will probably not experience the same inflation because of reduced needs for certain purchases. Inflation protection of 70 to 80% of the CPI is adequate for many people. You can also specify that the inflation protection be further reduced after a more advanced age.

Record below, the basic information required to prepare retirement income projections.

	Client	Partner
Date of Birth Years before retirement Number of years over which your savings will be used to provide funds for retirement (usually to age 90)		
Eligibility for Employer Pensions		
Date at which pension payments commence Annual pension income at that time Bridging supplement to age 65 Indexation of pension income Survivor's benefit	\$ \$%	\$%
Additional Employer Pensions		
Date at which pension payments commence Annual pension income at that time Bridging supplement to age 65 Indexation of pension income Survivor's benefit	\$ \$% %	\$% %
<b>Government Pensions in Current Dollars</b>		
Date at which CPP payments commence CPP retirement benefits at that time Old Age Security	\$ \$	\$ \$
Current Savings		
Tax-sheltered savings in TFSAs, etc. Investment return on TFSAs, etc. TFSA contribution room for current year Survivor's benefit	\$% \$%	\$
Tax-sheltered Savings in RRSPs, etc. Investment return on RRSPs, etc. RRSP contribution room for current year Survivor's benefit	\$% \$%	\$
Tax Paid Capital After-tax investment return until retirement Taxable investment return after retirement Non-taxable investment return after retirement Survivor's benefit	\$% % %	% %
Current earned income before tax Annual increase in income expected	\$%	\$%

Record below, the basic information required to calculate the % of income to save.

At retirement and in current dollars	\$ 
Annual Rate of:	
Inflation expected (Consumer Price Index) Inflation protection during retirement	 % %
When you turn age reduce the inflation protection to	 %
When you turn age change the amount of lifestyle expenditures by	\$ 

## **EXPLANATION FOR DEFINED BENEFIT PENSION PLANS**

Defined-benefit pensions are quite complex. The information should be available from your employer. If you have a benefit booklet describing the pension simply attach it to the questionnaire. If you can easily complete this part of the questionnaire, do so. If not, leave it to your planner.

## **Current Pensionable Earnings (PE)**

Pensionable earnings are those included in determining pension income at retirement. They may or may not include bonuses, overtime and taxable benefits.

## **Yearly Maximum Pensionable Earnings (YMPE)**

**Lifestyle Expenditures** 

The YMPE is the maximum employment earnings on which the Canada Pension Plan and Quebec Pension Plan are based.

Record below the information required to calculate the retirement benefit and pension adjustments for any **Defined Benefit Pension Plans** you may be a member of.

		Client	Partner	
Current Pensionable Earnings (PE) Annual increase in PE expected Years of service expected at retirement	\$	%	\$	 % 
Age at which pension payments commence Indexation of annual pension income (if any)		%		 %
% of pensionable earnings per year of service For earnings below the YMPE For earnings above the YMPE		% %		% %
Number of years averaged for final PE Number of years averaged for final YMPE				
Please indicate any reductions in pension for surv	vivor's be	nefits or ear	ly retirement.	

## **EXPLANATION FOR DEFINED CONTRIBUTION PENSION PLANS**

The information should be available from your employer. If you have a benefit booklet describing the pension simply attach it to the questionnaire. If you can easily complete this part of the questionnaire, do so. If not, leave it to your planner.

## **Current Pensionable Earnings (PE)**

Pensionable earnings are those included in determining pension income at retirement. They may or may not include bonuses, overtime and taxable benefits.

#### **Contribution Rate**

This is the combined rate for you and your employer. Some plans increase the employer's contribution rate as you get older. If so, you can specify the age at which the contribution rate changes.

#### **Reduction in Contribution Rate**

Under some plans, the contribution rate is reduced for earnings up to the YMPE because both you and your employer contribute to the Canada (or Quebec) Pension Plan.

### **Options**

Upon retirement you may purchase an annuity (pension income) or transfer the savings to a Locked-In Retirement Account. Your employer should have information on these two options.

If you are a member of a **Defined Contribution Pension Plan** (also known as money purchase plan), record below the information required to calculate the retirement benefit and pension adjustments.

		Client	Partner	
Current Pensionable Earnings (PE) Annual increase in PE expected Age at which to retire from plan membership	\$	%	\$	_ _% _
Current combined contribution rate When employee reaches age change the contribution rate to		% %		%  %
When employee reaches age change the contribution rate to Reduction in the contribution rate for PE up to the YMPE (if any)		% %		% % %
Current savings in defined contribution plan Investment return on the savings	\$	%	\$	_ %
Option 1 - Purchase an annuity				
Age at which annuity payment will begin				
Option 2 - Transfer to a Locked - In Retireme	ent Accoun	t		
Age at which to transfer the pension savings				

## **EXPLANATION FOR LOCKED IN RETIREMENT ACCOUNTS**

Locked In Retirement Accounts (LIRA) and Life Income Funds (LIF) have certain restrictions that limit the amount of money that can be removed each year.

## Age at which to annuitize

At any age, you can convert the funds in a LIF into a life annuity. The number of years over which to amortize the savings is the life expectancy in years for you and your spouse. The current life expectancy for an 80-year-old male is 7 years and an 80-year-old female is 9 years. You are not required to ever purchase an annuity with your LIF.

If you have funds in a Locked In Retirement Account, record the details below.

	Client	Partner
Current savings in LIRAs, LIFs and LRIFs Investment return on these savings	\$%	\$%
Option 1 - Purchase an annuity		
Age at which annuity payment will begin		
Option 2 - Transfer to a Life Income Fund		
Interest rate for maximum withdrawal (CANSIM) Age at which to start maximum withdrawal (if any) Age at which to annuitize (if ever)	%	%
Number of years over which to amortize savings Annual indexation of annuity payments (if any)		

# **Other Considerations**

There may have been a number of questions that arose as you completed this questionnaire. You can record these here as a memory-jogger to ensure they are resolved before the Retirement Plan is completed.
Do you have plans to relocate or sell your current home or otherwise significantly alternatives.
your lifestyle?
